

Task 4 – Docker Container Deployment

Name: MeharParnami

Platform: InternSpark

Procedure

- Objective: Deploy Docker container on EC2. •

Installed Docker.

- Started Docker service.
- Stopped Apache.
- Ran Nginx container.
- Verified with docker ps and browser.

Technologies Used

- Docker
- Nginx
- AWS EC2

Screenshots to Attach

- docker ps
- Welcome to nginx page

Conclusion

Docker container was deployed successfully.

Public IP: 51.20.44.28

Docker Image: nginx

Port: 80

Commands Used: docker --version, docker run -d -p 80:80 nginx, docker ps

Welcome to nginx!

If you see this page, nginx is successfully installed and working. Further configuration is required for the web server, reverse proxy, API gateway, load balancer, content cache, or other features.

For online documentation and support please refer to nginx.org.
To engage with the community please visit community.nginx.org.
For enterprise grade support, professional services, additional security features and capabilities please refer to f5.com/nginx.

Thank you for using nginx.
